Investment update - June

Equity markets performed strongly over June. The Japanese market continued to lead the way with sentiment buoyed by the improving economic backdrop. The US market also performed well and it is encouraging to see market leadership broaden away from 'big tech'. Corporate earnings growth is slowing across the developed world but not by as much as first feared. The relatively modest earnings downgrades and the degree of resilience the corporate sector is showing is incompatible with a 'normal' recessionary environment. US inflation has dropped to 4% and it is expected that the US Federal Reserve can now pause its tightening cycle. In contrast, above expectation inflation numbers in the UK led to the Bank of England raising interest rates to 5% with peak rate expectations up to 6%. Central banks will be closely observing economic indicators to assess the effect of higher rates and tighter lending conditions, which may add some uncertainty to the future direction of policy. No changes were made over the month – equity market exposures were maintained as the strategy remains at the top end of its allowable equity range. We are exploring a potential opportunity to reallocate some equity exposure towards continental Europe and Japan, whilst slightly reducing exposure to the US. We believe that valuations in both regions look attractive, whilst in Japan the long-term disinflationary cycle may be nearing an end.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Abrdn, Aviva, Embark, FundsNetwork, Fusion, Hubwise, M&G Wealth, Novia, Nucleus, 7IM, Quilter and Transact.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a **Bordier Risk Profile 5** and **Defaqto Risk Rating 8 (Adventurous)**.

Headline positioning

- The strategies remain at the upper end of their allowable equity range with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
