#### Investment update - July

Equity markets rose over July, driven in part by weaker-than-expected inflation data from the US. This led to hopes that interest rate policy could reverse before the end of the year and increased optimism of a 'soft landing' (i.e. the economy holding up while inflation steadily recedes). However, the monetary backdrop is somewhat complicated as spending moves towards services while goods prices fall. Central banks are unlikely to feel comfortable shifting policy until tight labour markets (and persistent wage growth) show signs of weakening. Markets are drawing encouragement from the most recent earnings updates, which continue to prove resilient and inconsistent with what we would expect to see ahead of a recessionary period. We remain broadly optimistic about the outlook for the second half of the year as investors increasingly start to look to a generally improving economic picture in 2024 – our commitment to equities is therefore maintained, with the strategy remaining at the top end of its allowable equity range. We have, however, trimmed our commitment to the US market and some thematic funds in favour of a small re-entry to Europe. European equity markets have shown more resilience than anticipated to tough economic conditions and a valuation gap relative to the US is increasingly hard to ignore.

#### Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Abrdn, Aviva, Embark, FundsNetwork, Fusion, Hubwise, M&G Wealth, Novia, Nucleus, 7IM, Quilter and Transact.

#### Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

#### Risk profile

This strategy is managed with a maximum target of 20% equity market exposure and is categorised as a **Bordier Risk Profile 1** and with a **Defaqto Risk Rating 2 (Very Cautious)**.

## Headline positioning

- The strategies remain at the upper end of their allowable equity range as we remain broadly optimistic about the economic outlook for the second half of 2024.
- We have trimmed our commitment to the US market and some thematic funds in favour of exposure to Europe and an increased allocation to Japan (excluding Defensive) where opportunities have arisen.
- We continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
