Investment update - July

Equity markets rose over July, driven in part by weaker-than-expected inflation data from the US. This led to hopes that interest rate policy could reverse before the end of the year and increased optimism of a 'soft landing' (i.e. the economy holding up while inflation steadily recedes). However, the monetary backdrop is somewhat complicated as spending moves towards services while goods prices fall. Central banks are unlikely to feel comfortable shifting policy until tight labour markets (and persistent wage growth) show signs of weakening. Markets are drawing encouragement from the most recent earnings updates, which continue to prove resilient and inconsistent with what we would expect to see ahead of a recessionary period. We remain broadly optimistic about the outlook for the second half of the year as investors increasingly start to look to a generally improving economic picture in 2024 – our commitment to equities is therefore maintained, with the strategy remaining at the upper end of its corresponding Dynamic Planner risk profile. We have, however, trimmed our commitment to the US market and some thematic funds in favour of a small re-entry to Europe and an increase to Japan. European equity markets have shown more resilience than anticipated to tough economic conditions and a valuation gap relative to the US is increasingly hard to ignore. Japan is finally showing signs that it can escape from its deflationary malaise of the past few decades.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 5 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles as we remain broadly optimistic about the economic outlook for the second half of 2024.
- We have trimmed our commitment to the US market and some thematic funds in favour of exposure to Europe and an increased allocation to Japan (excluding RT3) where opportunities have arisen.
- We continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
