Investment update - December

Markets ended the year in a very positive mood with both equities and bonds performing strongly in December, adding to the excellent returns seen in November. 2023 has ultimately proved to be positive for equity investors with strong returns from most regions. However, returns have been far from uniform with growth stocks, in particular the 'magnificent seven' stocks at the top of the US index, providing a disproportionate amount of global equity returns over the year. It is encouraging to see that market leadership has broadened more recently with strength across the board. This includes some of the 'value' sectors that have lagged significantly during 2023. The key driver for markets over the year has undoubtedly been the outlook for inflation, and interest rate policy and expectations have moved from 'higher for longer' to the more recent view that central banks will reverse rate policy more significantly and earlier than expected. The more dovish outlook drove another excellent month from bonds. Coming into 2023 there were significant recession concerns across developed regions, however economic growth expectations have improved and data continues to point to an unexpected level of economic resilience. Looking ahead over the next two to three years global growth forecasts are moderate but nevertheless positive. No changes were made over the month as the strategy remains at the upper end of its corresponding Dynamic Planner risk profile. We retain a positive view on equities moving into 2024 and our positioning has been rewarded in a very strong end to the year for markets.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Abrdn, Aegon, Aviva, Fidelity, James Hay, M&G Wealth, Quilter and Transact platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 7, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles as we remain broadly optimistic about the economic outlook for the second half of 2024.
- We have trimmed our commitment to the US market and some thematic funds in favour of exposure to Europe and an increased allocation to Japan (excluding HP RT3) where opportunities have arisen.
- We continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
