Investment update - December

Markets ended the year in a very positive mood with both equities and bonds performing strongly in December, adding to the excellent returns seen in November. 2023 has ultimately proved to be positive for equity investors with strong returns from most regions. However, returns have been far from uniform with growth stocks, in particular the 'magnificent seven' stocks at the top of the US index, providing a disproportionate amount of global equity returns over the year. It is encouraging to see that market leadership has broadened more recently with strength across the board. This includes some of the 'value' sectors that have lagged significantly during 2023. The key driver for markets over the year has undoubtedly been the outlook for inflation, and interest rate policy and expectations have moved from 'higher for longer' to the more recent view that central banks will reverse rate policy more significantly and earlier than expected. The more dovish outlook drove another excellent month from bonds. Coming into 2023 there were significant recession concerns across developed regions, however economic growth expectations have improved and data continues to point to an unexpected level of economic resilience. Looking ahead over the next two to three years global growth forecasts are moderate but nevertheless positive. No changes were made over the month as the strategy remains at the upper end of its corresponding Dynamic Planner risk profile. We retain a positive view on equities moving into 2024 and our positioning has been rewarded in a very strong end to the year for markets.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Aviva and Fidelity platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 7 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles as we remain broadly optimistic about the economic outlook for the second half of 2024.
- We have trimmed our commitment to the US market and some thematic funds in favour of exposure to Europe and an increased allocation to Japan (excluding RT3) where opportunities have arisen.
- We continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
