### Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

### Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 7 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

### About the Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service consists of five actively managed investment growth strategies (Risk Targeted 3-7). Each strategy has a different level of risk and expected return, and are rigorously mapped within the volatility boundaries assigned to specific Dynamic Planner risk profiles (RTM 3-7).

### Investment update

February was a positive month overall for equity markets with all major developed market indices rising. Emerging markets also rose quite strongly. In contrast, most areas of the fixed income market fell over the month. The key positive driver for equities was a continued stream of better-than-expected earnings announcements, most notably in the US. The US economy also continues to prove resilient as manufacturing and labour data served to push the S&P 500 Index higher. European markets rose just under 3%, encouraged by some better economic data. The backdrop of unexpectedly resilient economic growth shaped a more hawkish view over the month, which put pressure on fixed income markets. We remain optimistic on the outlook for equities, which should be well supported by an improving earnings and economic outlook over the course of this year and into 2025. Therefore, no changes were made over the month as the strategy remains at the upper end of its Dynamic Planner risk profile. We retain core allocations to the US and Asia, which we believe offer the prospect of superior economic and earnings growth looking ahead, however it is encouraging to see real strength from Japan, which we allocated to last year. We continue to look to skew portfolios to themes that we believe will enjoy superior levels of growth going forward, such as companies set to benefit from the structural growth in sustainable energy and from advances in artificial intelligence.
