Investment update - March

March concluded an excellent first quarter of the year for equity markets with the MSCI World Index up a further 3.4% in sterling terms. Markets remain encouraged by economic data pointing to a resilient economic backdrop, particularly in the US. The Japanese market continues to perform strongly as investors increasingly see value opportunities as the health of the economy and corporate sector continue to improve. Resilient economic data and cautious rhetoric from central banks continues to cause some volatility in fixed income markets. March, however, saw some positive returns across both sovereign and corporate bonds against a mixed inflation backdrop. The European Central Bank has flagged a possible interest rate cut in June, dependent on wage growth continuing to moderate, and the expectation for the number of rate cuts in the US this year has now fallen to three. No changes were made over the month as the strategy remains at the top end of its allowable equity range. The US and Asia, now including Japan, remain our favoured regions for stockmarket exposure – these markets offer the best combination of plentiful and superior growth opportunities, attractive valuations, and access to longer-term beneficiaries of domestic demand and structural recovery potential. Exposure to European markets, including the UK, is also merited based on cheap valuations and future recovery potential. Within fixed income, our shifts made during 2023 and early 2024 to increase exposure to fixed interest investments are beginning to pay off as reductions in inflation and more certainty over interest rate cuts come into view. Exposure to alternative investments has been reduced in the past year to fund increased allocations to bond markets, but they have not lost their fundamental appeal.

Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. There are five actively managed investment strategies to choose from, each with its own risk profile and the ability to select an income option to benefit from regular income from the strategy as well as potential long-term capital growth.

Investment objective

To assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk profile

The strategy is managed with a maximum target of 40% equity market exposure and is categorised as a **Bordier Risk Profile 2**.

Headline positioning

- The strategies remain at the top end of their allowable equity range as we remain broadly optimistic about the economic outlook for the second half of 2024.
- We have trimmed our commitment to the US market and some thematic funds in favour of exposure to Europe and an increased allocation to Japan (excluding Defensive) where opportunities have arisen.
- We continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
