

Strategy details

Inception	2 June 2011
Min. initial investment	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.10%
Annualised volatility	10.78%

Annualised 3-year volatility data as at 30.04.24

Charges

Annual management charge*	0.30%
Ongoing charges figure	0.82%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a Bordier Risk Profile 5 and Defaqto Risk Rating 8 (Adventurous).

About the Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy.

Investment update

After a strong first quarter of the year, April was a difficult month for investors. The main catalyst for this reversal was a stronger-than-expected inflation number in the US, which, in conjunction with some continuing resilience in the economy, modified the markets' expectations around the timing and extent of potential interest rate cuts. Given the more recent data, markets are now pricing in two rate cuts in the US this year and a similar number in the eurozone and the UK. There is still considerable uncertainty on the timing of a reversal in rate policy. Markets will continue to speculate on the timing of a reversal in interest rate policy and this may cause some volatility in asset prices. We believe that the fundamental backdrop remains supportive for risk assets with positive levels of global economic growth looking ahead, receding inflationary pressures and the prospect of looser monetary policy moving into 2025. As such, no changes were made over the month to the strategy's headline asset allocation, which remains at the top end of its allowable equity range. We see an attractive combination of earnings growth recovery and reasonable valuations across key equity markets, including areas such as Europe and Japan, which now look more compelling on a global scale. In the UK equity sector, TM Crux UK Special Situations was sold. The fund, being smaller in size in terms of assets under management, has experienced significant outflows and we felt it prudent to exit our investment to avoid the potential of any issues exiting the fund in the future. The proceeds for this sale have been reinvested into JOHCM UK Growth, which operates in a similar manner. Volatility in fixed income markets is currently quite extreme however the thesis for our exposure to both sovereign bonds and corporate credit is very much intact given our views on the economy and the outlook for interest rates.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
Adventurous (98% eq.)	9.5%	8.1%	26.5%	84.6%
