

Strategy details

Inception	15 June 2015
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	2.66%
Annualised volatility	7.91%

Annualised 3-year volatility data as at 31.05.24

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.44%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 60% equity market exposure and is categorised as a Bordier Risk Profile 3 and Defaqto Risk Rating 5 (Balanced).

About the Hybrid Passive Managed Service

Our Hybrid Passive Managed Service consists of five actively managed investment strategies, ranging from Defensive to Adventurous, that provide lower cost access to our discretionary fund management capabilities through the combination of active and passive collective investments. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy. The service provides a solution that, when cost considerations are paramount, does not compromise on quality.

Investment update

Asset returns were strong over May with both developed market equities and global bonds rising. After a weak April, the US equity market rebounded strongly as rate expectations fell. Uncertainty over the interest rate outlook continues to bring some volatility however market momentum remains positive on the back of a strong corporate earnings season and improving economic data. On the inflation front, data stemming from the US in May was mixed. While the potential timing of interest rate cuts has been pushed forward, some loosening of policy in the US is still expected this year. European markets also performed well in May, as positive GDP growth was confirmed for Q1 and corporate earnings announcements surprised on the upside. Despite a recent modest tick up in inflation the European Central Bank continues to signal a potential rate cut in June. The UK market rose 2.5%, lagging the US and eurozone largely due to its 'value' bias and high exposure to energy stocks, which were impacted by a falling oil price. UK inflation fell to 2.3% and is expected to fall further still in the short term. Asian markets also rose overall but lagged their developed peers. We continue to see tailwinds which should be supportive for financial markets in the coming months, as such no changes were made over the month as the strategy remains at the top end of its allowable equity range. We expect further reductions in inflation towards central bank targets and a consequent easing of financial conditions as tight monetary policy is unwound. Evidence suggests that economic growth is recovering globally and this should be accompanied by growth in corporate earnings and improved profit margins. We are having to tolerate unusually high levels of volatility in sovereign bond markets but expect our exposure to be rewarded over the course of the next 12 months given our views on inflation and central bank policy. The yields available in investment grade credit remain compelling in our view and spreads are proving resilient. Our core alternatives funds continue to perform well, providing clear diversification benefits in times of market weakness.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr*
Balanced (60% eq.)	11.0%	11.4%	25.8%	-
ARC Balanced Asset PCI (30-70% eq.)	8.6%	3.9%	17.8%	-
CPI	1.7%	20.5%	23.7%	-
