

Strategy details

Inception	1 October 2020
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.40%

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including moderate to sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6 and is part of their RMD offering. The strategy's expected annual VaR is targeted to stay within the assigned Dynamic Planner risk profile's boundaries. The strategy is categorised as a Bordier Decumulation Risk Profile 3.

About the RTD Service

The service consists of three actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular Dynamic Planner Risk Managed Decumulation ('RMD') risk profile (4-6). Each investment strategy is checked by Dynamic Planner on a monthly basis to ensure that it stays within the expected annual Value at Risk ('VaR') boundaries assigned to the corresponding Dynamic Planner risk profile.

Investment update

August was a volatile month for markets. Equity markets initially sold off on the back of weak data from the US, stoking fears of a looming recession. Sentiment then shifted and markets staged a strong recovery as the weaker economic data increased expectations of imminent rate cuts in the US. Most markets ended the month in positive territory with interest rate sensitive sectors performing particularly well. The more doveish backdrop provided a strong environment for fixed income markets. Investment grade credit performed well as positive news flow suggests that the corporate sector is in good health and balance sheets are relatively strong. No asset allocation changes were made over the month. We remain comfortable at the upper end of the strategy's Dynamic Planner risk profile and maintain our current exposure to equity markets. Expectations regarding the strength of the global economy have incrementally improved and anticipated growth levels over the next three years should be supportive for risk assets. Within fixed income, exposure remains to both longer-dated fixed income assets and to investment grade credit where yields still offer some relative value and default rates look set to stay low. Our core alternatives funds continue to perform well and high stock dispersion provides a good environment for skilled stockpickers. We have reduced our exposure recently however as the opportunity set within conventional fixed income markets has improved.

Why decumulation?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

Performance

Inception performance

Annualised performance

	1yr	3yr*	5yr*	10yr*
RTD 6	11.7%	2.8%	-	-

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 31.08.24. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

Cumulative performance

	1yr	3yr*	5yr*	10yr*
RTD 6	11.7%	8.5%	-	-

Discrete performance

	YTD	2023	2022*	2021*	2020*	2019*
RTD 6	6.0%	7.8%	-6.1%	8.0%	5.7%	-

*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the orange dashed line).
