

Strategy details

Inception	1 October 2020
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.40%

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including moderate to sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6 and is part of their RMD offering. The strategy's expected annual VaR is targeted to stay within the assigned Dynamic Planner risk profile's boundaries. The strategy is categorised as a Bordier Decumulation Risk Profile 3.

About the RTD Service

The service consists of three actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular Dynamic Planner Risk Managed Decumulation ('RMD') risk profile (4-6). Each investment strategy is checked by Dynamic Planner on a monthly basis to ensure that it stays within the expected annual Value at Risk ('VaR') boundaries assigned to the corresponding Dynamic Planner risk profile.

Investment update

Although equity markets saw a wide dispersion of returns in September, all key regions remain firmly in positive territory so far this year. Weaker employment and consumer confidence data drove the US Federal Reserve to announce the first interest rate cut since March 2020, which was welcomed by financial markets. The European Central Bank also cut rates for the second time in response to some disappointing economic data that dampened investor confidence somewhat. Short-term sentiment in the UK was also knocked by data showing that wage pressures remain firm and concerns around the potential impact of the upcoming budget. The strongest returns came from Asian markets, which were driven by the announcement of a huge stimulus package in China. As would be expected, the more dovish sentiment benefitted fixed income assets with sovereign bond yields across all key regions falling (and values rising). Investment grade credit and higher yielding areas of fixed interest markets also produced strong returns. A backdrop of generally resilient global economic growth, moderating global inflation and reductions in interest rates should continue to be supportive for a wide range of asset classes for the rest of the year and into 2025. As such, we remain positive on the outlook for equities, with our exposure skewed to areas of relative economic strength (US and Asia). We also continue to see recovery and structural change potential in Japan and value opportunities in Europe and the UK. As a result, no changes were made over the month and the strategy remains at the upper end of its Dynamic Planner risk profile. Fixed interest markets are benefiting from reduced inflation and interest rates and our increased exposure and longer maturity profile have been working well. We have been gradually reducing our alternatives exposure in favour of fixed income however our market neutral 'absolute return' funds continue to deliver positive (absolute) returns regardless of market conditions.

Why decumulation?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

Performance

Inception performance

Annualised performance

	1yr	3yr*	5yr*	10yr*
RTD 6	12.9%	3.4%	-	-

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 30.09.24. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

Cumulative performance

	1yr	3yr*	5yr*	10yr*
RTD 6	12.9%	10.4%	-	-

Discrete performance

	YTD	2023	2022*	2021*	2020*	2019*
RTD 6	6.7%	7.8%	-6.1%	8.0%	5.7%	-

*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the orange dashed line).
