

Strategy details

Inception	1 March 2016
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.66%

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.68%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

About the Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service consists of five actively managed investment growth strategies (Risk Targeted 3-7). Each strategy has a different level of risk and expected return, and are rigorously mapped within the volatility boundaries assigned to specific Dynamic Planner risk profiles (RTM 3-7).

Investment update

2024 proved to be a good year for equities with all major developed markets ending the year in positive territory. This was despite a slight sell-off in markets at the end of December due to the US Federal Reserve projecting fewer interest rates cuts in 2025 owing to persistent sticky inflation. The US market led the way, part driven by the continued outperformance of some of the 'giant tech' companies. In contrast to the US, economic data in the eurozone has weakened over the year while political chaos in both Germany and France have added a layer of uncertainty in the region. This did not prevent eurozone markets rising in 2024, and we still believe that some measured exposure is appropriate. To an extent, the same can be said of the UK market where sentiment remains fragile, but valuations look similarly attractive. Markets do have some concerns about the economic outlook on the back of some weak data that suggests that the UK's economy remains on the brink of recession. The Japanese market performed well in 2024 with sentiment bolstered by a modest uptick in inflation, a positive given the deflationary slump Japan has experienced. Concerns around the potential impact of US tariffs, and a potentially stronger US dollar, have weighed on Asian markets since the US election result however a good return was still produced over the year. Returns from fixed interest markets were muted overall in 2024 although we saw the highest level of rate cuts since 2009. A backdrop of generally resilient global economic growth, moderating global inflation and reductions in interest rates should continue to be supportive for a wide range of asset classes moving into 2025, therefore the strategy remains at the upper end of its Dynamic Planner risk profile. Having reviewed the likely headwinds and tailwinds of a second Trump US presidency, we increased our exposure to smaller US companies in December at the expense of the sustainable/renewable energy exposure held within our thematic allocation. Elsewhere in the strategy, we remain positive on the outlook for fixed interest as the twin tailwinds of lower interest rates and low default rates in the corporate sector should push bond yields lower over 2025. Allocating to some low volatility absolute return funds should continue to play a valuable role during periods of market weakness.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
RT 6	8.4%	7.6%	22.5%	-
ARC Steady Growth PCI (50-90% eq.)	8.4%	4.3%	20.2%	-
