

Strategy details

Inception	2 July 2012
Min. initial investment	£20,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.67%
Annualised volatility	9.52%

Annualised 3-year volatility data as at 31.05.25

Charges

Annual management charge	0.75%
Ongoing charges figure	0.68%

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 80% equity market exposure and is categorised as a Bordier Risk Profile 4.

About the Managed Portfolio Service

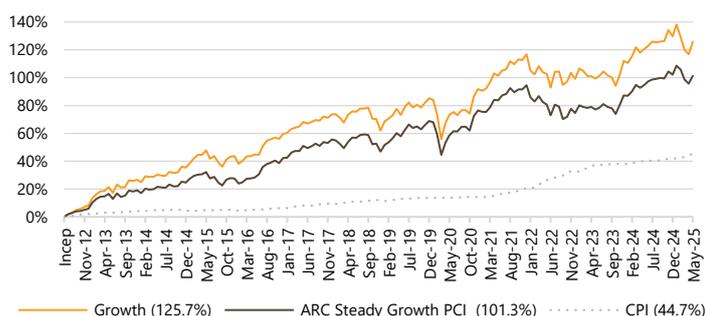

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service offers five actively managed investment strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy, and the ability to select an income option to benefit from regular income from the strategy as well as potential long-term capital growth.

Investment update

May was a strong month for equity markets with the MSCI World Index rising 5% in sterling terms. The key positive driver was some easing in trade policy tensions between the US and China. Cooler-than-expected inflation data in the US was also supportive to market sentiment. The US market led the way in terms of performance with the technology, industrials and consumer discretionary sectors particularly strong. Small-cap stocks also outperformed as sentiment on the economy improved and also on the expectation of supportive tax and regulatory initiatives announced in the US House of Representatives' reconciliation bill. Corporate earnings announcements remain generally encouraging across developed markets. All major equity markets performed well over the month, albeit the UK market lagged somewhat largely due to its inherent 'value' bias and the relative underperformance of sectors such as healthcare and resources. While sentiment improved markedly in May there is still much uncertainty, with President Trump threatening a 50% tariff on the EU. UK/EU discussions on the current trading framework took place with initial estimates of what might be agreed suggesting a muted economic benefit to the UK. It was a volatile month for fixed income markets. Despite the softer inflation data, sovereign bond yields rose mid-month on fiscal concerns, notably in the US where treasuries were downgraded by Moody's. Bond markets recovered toward the end of the month as a result of easing trade tensions and lessening inflation concerns, and most areas of high yield and investment grade credit posted positive returns. No changes have been made over the month and the strategy remains at the top end of its allowable equity range. Our decision to maintain equity exposure during the recent period of volatility has meant that we have captured the market rebound, notably in the US market. Several of our active managers have also significantly outperformed over the month, helped by the strength in mid and small caps. Within the defensive element of our portfolios, we have seen continued impressive risk-adjusted performance from our alternatives funds, which outperformed key bond indices and continue to provide positive returns and downside protection in periods of market volatility.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
Growth (80% eq.)	2.3%	11.4%	30.3%	52.6%
