

Strategy details

Inception	1 October 2020
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.36%

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including moderate to sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6 and is part of their RMD offering. The strategy's expected annual VaR is targeted to stay within the assigned Dynamic Planner risk profile's boundaries. The strategy is categorised as a Bordier Decumulation Risk Profile 4.

About the RTD Service

The service consists of three actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular Dynamic Planner Risk Managed Decumulation ('RMD') risk profile (4-6). Each investment strategy is checked by Dynamic Planner on a monthly basis to ensure that it stays within the expected annual Value at Risk ('VaR') boundaries assigned to the corresponding Dynamic Planner risk profile.

Investment update

June was another positive month for global equity indices, albeit there were unusually divergent returns across markets. The US equity market continued its sharp recovery from the tariff announcement-led falls in Q1, and the weaker dollar provided a boost for Asian markets, which saw the strongest returns. Having performed strongly year to date, eurozone markets were flat over the month, whilst the FTSE 100 Index was also flat. Within fixed income markets, UK and US government bond yields fell slightly. Our base case view is that the White House will manage to keep tariffs in place, and that the universal tariff level settles slightly above 10% - the key exception being China, where the level could be significantly higher. Assuming this is correct, the overall impact on global growth and inflation could be relatively modest, and not enough to derail the global economy or unduly disrupt the expected path of interest rates across key markets. We therefore retain our positive view on equities, believing the economic backdrop remains favourable and the outlook for corporate earnings remains positive. As such, no changes were made over the month, and the strategy remains at the upper end of its corresponding Dynamic Planner risk profile. Sovereign bonds offer relatively attractive yields, and important diversification benefits, while default rates across corporate debt markets remain low. Our alternatives funds continue to perform well, and we are preparing to add a new fund into this sector with a proven track record of producing strong risk-adjusted returns.

Why decumulation?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

Performance

Inception performance

Annualised performance

	1yr	3yr	5yr*	10yr*
RTD 6	5.1%	6.6%	-	-

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 30.06.25. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

Cumulative performance

	1yr	3yr	5yr*	10yr*
RTD 6	5.1%	21.1%	-	-

Discrete performance

	YTD	2024	2023	2022*	2021*	2020*
RTD 6	2.5%	7.1%	7.8%	-6.1%	8.0%	5.7%

*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the orange dashed line).
