

Hybrid Passive Risk Targeted solutions

Why Bordier UK

We are a wealth and investment manager whose core business is working with financial advisers to manage investment solutions on behalf of their clients. We are part of the Bordier Group, which was established in Geneva in 1844, and who currently operate in six countries across three continents. The Bordier Group manage around £16.7bn of assets.

We are truly independent, with no private equity or external shareholders. We have no appetite to further acquire or be acquired, which offers clients and their advisers stability and continuity, alongside significant financial strength to provide peace of mind. Importantly, we recognise that in many instances capital is not replaceable and great care must be taken to preserve it.

Investment philosophy

Our philosophy can be summarised as uncomplicated yet reassuring, with a focus on wealth preservation and a devotion to meeting client expectations. We take no direction from benchmarks, instead choosing to have freedom and flexibility in our forward-looking, proactive approach to asset allocation. It is a tried and tested methodology that we've operated in the UK for over 40 years.

High conviction management

Market-leading efficiency to execute highly active asset allocation and fund selection changes across our range of investment solutions. Our high conviction approach, with timely implementation of key investment decisions, ensures good client outcomes – no client is left behind.

Fund picking expertise

Our highly experienced research team, whose experience spans various market cycles, focus on identifying tomorrow's winners. With no internal funds, the team are unconstrained to analyse the entire market and have a successful track record of selecting managers who have outperformed their relative benchmarks and peer groups.

Differentiated approach

Our approach is exemplified by our allocation to alternative investments. We believe that the primary objective of an 'alternatives' allocation should be to provide an uncorrelated return profile to traditional asset classes – a key characteristic many portfolios lack. We utilise long/short market neutral funds to support our focus on wealth preservation.

Our Hybrid Passive Risk Targeted solutions

Our Hybrid Passive Risk Targeted ('RT') solutions consist of five actively managed investment strategies with different levels of risk and expected return, offering you access to our discretionary fund management capabilities at a lower cost through the combination of active and passive collective investments. The propositions provide a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another.

All our Hybrid Passive RT models are managed in accordance to Dynamic Planner's Risk Target Managed ex-ante assigned boundaries. The models are checked on a quarterly basis to ensure they stay within the expected volatility boundaries assigned to the Dynamic Planner profiles, whilst offering suitable exposure to at least six asset classes included within the respective Dynamic Planner asset allocations.

The portfolios can be held within general investment accounts, ISAs and SIPPs.

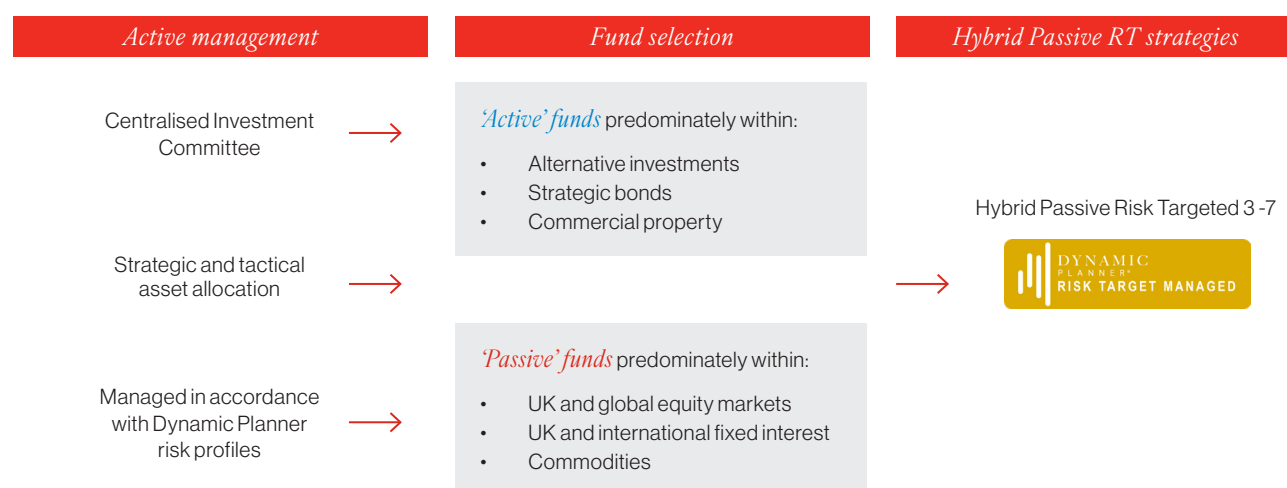

- Dynamic Planner Risk Target Managed: each strategy is managed within the agreed Dynamic Planner risk boundary, meaning it does not drift outside of your agreed risk tolerance, assisting your adviser with their ongoing suitability assessment.
- Robust and repeatable: our centralised investment process ensures consistent implementation of asset allocation and fund selection relevant to each client's risk profile, helping provide consistent outcomes across all client portfolios.
- Risk management: consistent implementation ensures appropriate risk management and reward relevant to your risk profile and risk/return expectation.
- Reassurance: increased Dynamic Planner oversight provides a robust governance framework for each strategy.
- Track record: a long record of producing strong and consistent risk-adjusted returns.

Strategy *overview*

Strategy	Current equity exposure	Current ongoing charges figure	Dynamic Planner risk profile
Hybrid Passive RT3	22%	0.44%	
Hybrid Passive RT4	43%	0.42%	
Hybrid Passive RT5	61%	0.42%	
Hybrid Passive RT6	79%	0.42%	
Hybrid Passive RT7	94%	0.40%	

As at 31 July 2025.

Constructing our *Hybrid Passive RT strategies*

Hybrid Passive RT 5 strategy – *example overview*

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 5, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Asset allocation

Top 10 holdings

Holding	%	Holding	%
TwentyFour Corporate Bond	7	Jupiter Merian Global Equity Absolute Return	5
abrdn Asia Pacific ex-Japan Tracker	6	Premier Miton US Opportunities	5
Schroder Strategic Credit	6	Vanguard UK Long Duration Gilt Index	5
Fidelity Index UK	5	Artemis US Smaller Companies	4
HSBC American Index	5	Fidelity Index US	4

Ongoing charges figure

Underlying funds' ongoing charges figure	0.42%
The ongoing charges figure ('OCF') relates to the current cost of the underlying holdings' OCFs within the strategy and is calculated on a weighted average basis.	
All data as at 31 July 2025. Please note total costs and charges including AMC and platform fees will be added in accordance with your service	

Accessing the solutions and service details
