

### Strategy details

Inception	2 July 2012
Min. initial investment	£20,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.08%
Annualised volatility	10.51%

Annualised 3-year volatility data as at 31.08.25

### Charges

Annual management charge	0.75%
Ongoing charges figure	0.65%

### Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

### Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a Bordier Risk Profile 5.

### About the Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service offers five actively managed investment strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy, and the ability to select an income option to benefit from regular income from the strategy as well as potential long-term capital growth.

### Investment update

Equity markets rose further in August with the MSCI World Index rising just over 2% in local currency terms. The Bank of England cut interest rates by 25bps, despite the July inflation number coming in higher than expected. Large cap UK equities rose, however mid and smaller companies fell as expectations of further rate cuts were tempered by cautious guidance coming out of the Monetary Policy Committee meeting. The Japanese market performed strongest, buoyed by the recently agreed trade deal with the US and by some encouraging economic data. European markets crept up further despite the political chaos in France and the rising concerns over the country's debt levels and budget deficit. The most notable data release was the US non-farm payrolls, which pointed to a slowdown in the labour market. This prompted the US Federal Reserve chair to allude to potential further policy loosening and the bond market is now pricing in a close to 90% chance of a 25bp rate cut this month. Corporate newsflow remains broadly supportive globally. Returns across fixed income markets were mixed, reflecting the heightened disparities in regions and countries currently. UK gilt yields rose on the back of higher inflation data and some concerns about the fiscal position of the UK. In contrast, US Treasury bond yields fell on expectations of policy loosening this month. Investment grade credit spreads tightened further in the US and Europe reflecting the generally positive corporate news flow. We are maintaining our equity exposure as we believe that the outlook for risk assets remains supportive. Therefore, the strategy remains at the top end of its allowable equity range. We expect the global economy to grow close to 3% per annum for the next couple of years, which is below the long-term average but still reasonable relative to more recent periods, and we expect inflationary pressures to remain at relatively comfortable levels for central banks. The most recent sets of company results across developed markets have also been broadly encouraging and earnings growth forecasts looking ahead into next year remain healthy. Fixed income assets offer a combination of attractive yields and diversification benefits to portfolios while our alternatives funds continue to produce absolute returns with very low volatility.

### Performance

#### Inception performance

#### Cumulative performance

	1yr	3yr	5yr	10yr
Adventurous (98% eq.)	6.0%	15.9%	36.0%	78.8%
