Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

Risk profile

The strategy is managed with a maximum target of 20% equity market exposure and is categorised as a Bordier Risk Profile 1.

About the Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service offers five actively managed investment strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy, and the ability to select an income option to benefit from regular income from the strategy as well as potential long-term capital growth.

Investment update

October was another strong month for equity markets with the MSCI World Index up 2.6% in local currency terms. Bond markets were also broadly positive and overall portfolio returns were further enhanced by a significant strengthening in the US dollar versus sterling. Trade tensions and negotiations between the US and China were a major influence on markets in October, with concerns over further trade restrictions leading to a sharp market sell off at the beginning of the month. However, these concerns then receded, leading to a strong recovery in markets, and the month culminated in a conciliatory trade deal being struck between the two nations. In addition to easing trade tensions, markets were also buoyed by encouraging earnings announcements. The Japanese market led the way with expectations that the new prime minister will look to adopt pro-economic growth policies during her tenure. Asian markets also continued their excellent run with technology companies performing very strongly. Elsewhere, the UK market rose 3.7%, with dollar strength benefitting companies with significant overseas earnings. Within fixed income, the most notable returns came from UK gilts on the back of moderating expectations on both inflation and growth. Our longer duration UK gilt holding, held across our strategies with a fixed income component, rose nearly 6% over the month. Global earnings forecasts remain robust, with expectations for double-digit growth into 2026, led by the US and Asia. We believe that global equity valuations are broadly reasonable, albeit a little less compelling than earlier in the year. During the month, we reduced our UK domestic small/mid-cap exposure to increase international revenue streams and sector diversification. In the US, we also trimmed small/mid-cap holdings, reallocating to large caps. This will naturally raise exposure to technology and AI-related momentum, which should benefit from the easing of US monetary policy. The strategy remains at the top end of its allowable equity range. The interest rate and inflation backdrop remains supportive, with falling yields and easing inflation creating opportunities across sovereign and credit markets.
