

Risk Targeted Decumulation solutions

Why Bordier UK

We are a wealth and investment manager whose core business is working with financial advisers to manage investment solutions on behalf of their clients. We are part of the Bordier Group, which was established in Geneva in 1844, and who currently operate in six countries across three continents. The Bordier Group manage around £17.4 bn of assets.

We are truly independent, with no private equity or external shareholders. We have no appetite to further acquire or be acquired, which offers clients and their advisers stability and continuity, alongside significant financial strength to provide peace of mind. Importantly, we recognise that in many instances capital is not replaceable and great care must be taken to preserve it.

Investment philosophy

Our philosophy can be summarised as uncomplicated yet reassuring, with a focus on wealth preservation and a devotion to meeting client expectations. We take no direction from benchmarks, instead choosing to have freedom and flexibility in our forward-looking, proactive approach to asset allocation. It is a tried and tested methodology that we've operated in the UK for over 40 years.

High conviction management

Market-leading efficiency to execute highly active asset allocation and fund selection changes across our range of investment solutions. Our high conviction approach, with timely implementation of key investment decisions, ensures good client outcomes – no client is left behind.

Fund picking expertise

Our highly experienced research team, whose experience spans various market cycles, focus on identifying tomorrow's winners. With no internal funds, the team are unconstrained to analyse the entire market and have a successful track record of selecting managers who have outperformed their relative benchmarks and peer groups.

Differentiated approach

Our approach is exemplified by our allocation to alternative investments. We believe that the primary objective of an 'alternatives' allocation should be to provide an uncorrelated return profile to traditional asset classes – a key characteristic many portfolios lack. We utilise long/short market neutral funds to support our focus on wealth preservation.

Our Risk Targeted Decumulation solutions

Our Risk Targeted Decumulation ('RTD') solutions are specifically intended for clients in pension drawdown. The solutions shift the focus from performance-driven accumulation to investment strategies that put capital preservation first, and seek to minimise the risk of eroding capital values in falling markets whilst you take a fixed regular income.

Importantly, the solutions provide peace of mind if you are worried about taking undue risk and seeking a smoother financial journey in retirement.

Our RTD solutions consist of four actively managed investment strategies with different levels of risk and expected return, with each targeted to a particular decumulation risk profile.

- Risk targeted strategies: each strategy is managed within the agreed risk boundary, meaning it does not drift outside of your agreed risk tolerance, assisting your adviser with their ongoing suitability assessment.

- Robust and repeatable: our centralised investment process ensures consistent implementation of asset allocation and fund selection relevant to each client's risk profile, helping provide consistent outcomes across all client portfolios.
- Track record: a long record of producing strong and consistent risk-adjusted returns.
- Risk management: consistent implementation ensures appropriate risk management and reward relevant to your risk profile and risk/return expectation, as well as assisting your adviser with what assumptions to build into their cashflow modeller.
- Reassurance: by operating within tighter risk constraints, on a month-to-month basis, the solution provides greater control over anticipated maximum drawdown, by using Value at Risk ('VaR') assumptions.

The strategies offer you access to our discretionary fund management capabilities at a lower cost through the combination of active and passive collective investments: a solution that, when cost considerations are paramount, does not compromise on quality.

Strategy overview

Strategy	Ongoing charges figure	Annualised expected VaR*	VaR boundaries	Bordier Decumulation risk profile	Dynamic Planner risk profile	Defaqto Income Drawdown rating
Risk Targeted Decumulation 4	0.38%	8.3%	6.0-9.0%			
Risk Targeted Decumulation 5	0.35%	11.2%	9.0-12.0%			
Risk Targeted Decumulation 6	0.30%	14.1%	12.0-15.0%			
Risk Targeted Decumulation 7	0.25%	17.0%	15.0-18.0%			

*Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions.
Ongoing charges figure as at 31 October 2025.

Risk Targeted Decumulation 5 strategy – *example overview*

Investment objectives

To assist investors in drawdown, looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 5, with the strategy's expected annual VaR targeted to stay within the assigned risk profile's boundaries. The strategy is categorised as a Bordier Decumulation Risk Profile 3.
