

Strategy details

Inception	1 March 2016
Min. initial investment (direct)	£20,000
Min. initial investment (platform)	£1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.88%

Charges

Annual management charge (direct)	0.75%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.63%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

About the Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service consists of five actively managed investment growth strategies (Risk Targeted 3-7). Each strategy has a different level of risk and expected return, and are rigorously mapped within the volatility boundaries assigned to specific Dynamic Planner risk profiles (RTM 3-7).

Investment update

October was another strong month for equity markets with the MSCI World Index up 2.6% in local currency terms. Bond markets were also broadly positive and overall portfolio returns were further enhanced by a significant strengthening in the US dollar versus sterling. Trade tensions and negotiations between the US and China were a major influence on markets in October. Concerns over further trade restrictions led to a sharp market sell off at the beginning of the month. However, these concerns then receded, leading to a strong recovery in markets, and the month culminated in a conciliatory trade deal being struck between the US and China. In addition to easing trade tensions, markets were also buoyed by encouraging earnings announcements. The Japanese market led the way with expectations that the new prime minister will look to adopt pro-economic growth policies during her tenure. Asian markets also continued their excellent run with technology companies performing very strongly. Elsewhere, the UK market rose 3.7%, with dollar strength benefitting companies with significant overseas earnings. Within fixed income, the most notable returns came from UK gilts on the back of moderating expectations on both inflation and growth. Our longer duration UK gilt holding, held across our strategies with a fixed income component, rose nearly 6% over the month. Global earnings forecasts remain robust, with expectations for double-digit growth into 2026, led by the US and Asia. We believe that global equity valuations are broadly reasonable, albeit a little less compelling than earlier in the year. During the month, we reduced our UK domestic small/mid-cap exposure to increase international revenue streams and sector diversification. In the US, we also trimmed small/mid-cap holdings, reallocating to large caps. This will naturally raise exposure to technology and AI-related momentum, which should benefit from the easing of US monetary policy. The strategy remains at the upper end of its corresponding Dynamic Planner risk profile. The interest rate and inflation backdrop remains supportive, with falling yields and easing inflation creating opportunities across sovereign and credit markets.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr
RT 6	13.7%	32.0%	49.5%	-
