

Strategy details

Table with 2 columns: Detail and Value. Rows include Inception (1 October 2020), Min. initial investment (direct) (£20,000), Min. initial investment (platform) (£1,000), Rebalancing strategy (min.) (Quarterly), and Currency (£ GBP).

Charges

Table with 2 columns: Charge Type and Rate. Rows include Annual management charge (direct) (0.75%), Annual management charge (platform)* (0.30%), and Ongoing charges figure (0.38%).

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 4 and is part of their RMD offering. The strategy's expected annual VaR is targeted to stay within the assigned Dynamic Planner risk profile's boundaries. The strategy is categorised as a Bordier Decumulation Risk Profile 2.

About the RTD Service

The service consists of four actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular Dynamic Planner Risk Managed Decumulation ('RMD') risk profile (4-7). Each investment strategy is checked by Dynamic Planner on a monthly basis to ensure that it stays within the expected annual Value at Risk ('VaR') boundaries assigned to the corresponding Dynamic Planner risk profile.

Investment update

October was another strong month for equity markets with the MSCI World Index up 2.6% in local currency terms. Trade tensions and negotiations between the US and China were a major influence on markets in October. Asian markets continued their excellent run with technology companies performing very strongly. Elsewhere, the UK market rose 3.7%, with dollar strength benefitting companies with significant overseas earnings. Within fixed income, the most notable returns came from UK gilts on the back of moderating expectations on both inflation and growth. Our longer duration UK gilt holding rose nearly 6% over the month. Global earnings forecasts remain robust, with expectations for double-digit growth into 2026. We believe that global equity valuations are broadly reasonable, albeit a little less compelling than earlier in the year. During the month, we reduced our UK domestic small/mid-cap exposure to increase international revenue streams and sector diversification. In the US, we also trimmed small/mid-cap holdings, reallocating to large caps. This will naturally raise exposure to technology and AI-related momentum, which should benefit from the easing of US monetary policy. The strategy remains at the upper end of its corresponding Dynamic Planner risk profile. The interest rate and inflation backdrop remains supportive, with falling yields and easing inflation creating opportunities across sovereign and credit markets.

Performance

Inception performance

Cumulative performance

Table with 5 columns: Period (1yr, 3yr, 5yr*, 10yr*) and Value. Row for RTD 4 shows values: 6.4%, 18.8%, 17.1%, -.

Discrete performance

Table with 7 columns: YTD, 2024, 2023, 2022*, 2021*, 2020*. Row for RTD 4 shows values: 6.1%, 3.9%, 6.2%, -5.4%, 2.3%, 2.9%.

Annualised performance

Table with 5 columns: Period (1yr, 3yr, 5yr*, 10yr*) and Value. Row for RTD 4 shows values: 6.4%, 5.9%, 3.2%, -.

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 31.10.25. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the orange dashed line). Source: Bordier UK & FE Analytics as at 31.10.25. Bordier UK returns net of 0.30% AMC. VAT applied to AMC from inception until 31.08.21. Past performance is not a guide to future results. See full risk warning overleaf.
