

Strategy details

Inception	02 June 2011
Min. initial investment (platform)	£ 1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.23%
Annualised volatility	10.10%

Annualised 3-year volatility data as at 31.12.25

Charges

Annual management charge (platform)*	0.30%
Ongoing charges figure	0.70%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a Bordier Risk Profile 5 and Defaqto Risk Rating 8 (Adventurous).

About the Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous. Each strategy has a different level of risk and potential return, with risk categorised by equity market exposure that increases in increments of 20% for each strategy.

Investment update

The MSCI World Index rose 0.6% over December in local currency terms, however some weakness in the US dollar meant that returns to sterling investors were slightly negative. Overall returns from global fixed income assets were similarly muted and the Barclays Global Aggregate Index fell 1.2% in sterling terms. Central bank interest rate policy was at the forefront of markets' attention over the month. The Bank of England cut interest rates for the first time since August. This was prompted by weaker consumer and business spending, as well as further evidence of a weaker labour market. A combination of heightened rate cut expectations and some strength in mining and defence stocks did, however, send the UK market higher. The US also cut rates for the third time this year as inflation fell. The US market was flat over the month in dollar terms. The European Central Bank again kept interest rates on hold as eurozone inflation was also revised down slightly. 2025 has ultimately proved to be a good year for investors with virtually all major asset classes making positive returns. President Trump's chaotic tariff announcements earlier in the year caused significant market disruption, however global markets have since surged higher driven by an increasingly benign inflation and interest rate backdrop, allied with better-than-expected corporate results announcements. We therefore enter the new year with a full allocation to equities, maintaining a skew to the US and Asia as regions we expect to provide superior economic and corporate earnings growth. During the month, we added the Zennor Japan Equity Income fund to our Japanese sector allocation. This decision reflects our strategy to shift toward smaller-cap companies with greater domestic Japanese exposure, positioned to benefit from the positive outlook for the yen. The strategy remains at the top end of its allowable equity range. Where relevant to the strategy we are allocating to fixed income and low risk, uncorrelated alternative investments, which should provide protection in periods of equity market weakness.

Performance

Inception performance

Annualised performance

	1yr	3yr	5yr	10yr
PMPS Adventurous (98% eq.)	10.1%	9.0%	6.3%	6.8%
