

Strategy details

Inception	01 October 2020
Min. initial investment (direct)	£ 20,000
Min. initial investment (platform)	£ 1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

Charges

Annual management charge (direct)	0.60%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.35%

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk profile

The strategy is risk target managed in accordance with independently defined annual VaR boundaries provided by Dynamic Planner. The strategy is categorised as a Bordier Decumulation Risk Profile 3, Dynamic Planner Risk Managed Decumulation 5, Defaqto Low Sequencing Risk and Mabel Insights 2.

About the RTD Service

The service consists of four actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular risk profile. Each investment strategy is independently verified on a monthly basis to ensure that it stays within the expected annual VaR boundaries assigned to the corresponding risk profile.

Investment update

January was a generally good month for equities with all major indices up in local currency terms. Some weakness in the US dollar versus sterling did, however, offset gains in the US market, resulting in the MSCI World Index return being broadly flat in sterling terms. The Global Aggregate Bond Index fell 1.1%. The broadly positive macroeconomic backdrop for equity markets remains in place as we move into 2026. Key economic indicators continue to improve while inflationary pressures remain relatively comfortable for central banks. Corporate newsflow also remains positive overall. Asian markets performed particularly strongly, returning 7% over the month. Market volatility remains high, however, and geopolitical risks are swaying sentiment. The generally positive economic news, and corresponding easing in interest rate cut expectations, weighed on sovereign bonds however index-linked and corporate debt proved more resilient. Overall, we still see current conditions as favourable for a range of asset classes. We remain comfortable with the strategy remaining at the upper end of its corresponding Dynamic Planner risk profile, with regional equity positioning continuing to favour the US and Asia over the UK and Europe. The outlook for corporate earnings growth remains positive and continued investment in productivity-enhancing technologies such as AI should underpin longer-term growth. In fixed income markets our positioning is expressed via shorter-maturity exposure to corporate bonds and longer-duration positioning in government bonds, which should benefit from further interest rate reductions.

Why RTD?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

Performance

Inception performance

Annualised performance

	1yr	3yr	5yr*	10yr
Risk Targeted Decumulation 5 (33% eq.)	7.4%	6.5%	4.4%	-

Discrete performance

	YTD	2025	2024	2023	2022*	2021*
Risk Targeted Decumulation 5 (33% eq.)	0.9%	8.5%	5.7%	6.9%	-5.2%	5.1%

Cumulative performance

	1yr	3yr	5yr*	10yr
Risk Targeted Decumulation 5 (33% eq.)	7.4%	20.9%	24.0%	-

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 31.01.26. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the red dashed line).
