

April 2026

Strategy details

Inception	31 July 2025
Min. initial investment (direct)	£ 20,000
Min. initial investment (platform)	£ 1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

Charges

Annual management charge (direct)	0.60%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.27%

*Not including platform fees.

Investment objective

To assist investors in drawdown, looking to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including moderate to sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is risk target managed in accordance with independently defined annual VaR boundaries provided by Dynamic Planner. The strategy is categorised as a Bordier Decumulation Risk Profile 5, Dynamic Planner Risk Managed Decumulation 7, Defaqto Medium Sequencing Risk and Mabel Insights 4.

About the RTD Service

The service consists of four actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular risk profile. Each investment strategy is independently verified on a monthly basis to ensure that it stays within the expected annual VaR boundaries assigned to the corresponding risk profile.

Why RTD?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

Investment update

After the weakness seen in March, equity markets staged a sharp rally in April. Technology stocks performed exceptionally strongly, benefitting US and Asian markets. Returns from markets such as the UK were more muted. Continued uncertainty surrounding the Middle East conflict meant that the oil price rose in April. Improving sentiment over the prospect of a ceasefire therefore seems to have been only partly responsible for the market rally. The other key driver was the very strong set of corporate earnings announcements. Concerns over the potential impact of higher energy prices on inflation impacted government bonds, however the more positive equity sentiment boosted confidence in corporate debt, benefitting credit markets. We have been rewarded for not cutting overall equity exposure in reaction to the market sell off in March. While the conflict in the Middle East will impact the shorter-term outlook for growth and inflation, we do not believe it will be sufficient to derail our positive thesis for risk assets. We acknowledge that a very prolonged conflict could change the macroeconomic backdrop more materially however, for now, we are maintaining our current equity exposure while the strategy continues to target its corresponding Dynamic Planner risk profile. In acknowledgement of heightened geopolitical risks, we have slightly reduced risk by cutting exposure to Asian equities. These proceeds have primarily been reallocated to infrastructure assets that offer more defensive characteristics. We remain more cautious on fixed income markets and have therefore reduced inflation/interest rate risk by selling our longer-dated gilt exposure.

Performance

Inception performance (available from 1 August 2026)

Annualised performance

	1yr	3yr	5yr	10yr
Risk Targeted Decumulation 7 (65% eq.)	-	-	-	-

Discrete performance

	YTD	2025	2024	2023	2022	2021
Risk Targeted Decumulation 7 (65% eq.)	-	-	-	-	-	-

Cumulative performance

	1yr	3yr	5yr	10yr
Risk Targeted Decumulation 7 (65% eq.)	-	-	-	-

Annualised expected loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 30.04.26. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.
