

### Strategy details

Inception	01 October 2020
Min. initial investment (direct)	£ 20,000
Min. initial investment (platform)	£ 1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP

### Charges

Annual management charge (direct)	0.60%
Annual management charge (platform)*	0.30%
Ongoing charges figure	0.38%

\*Not including platform fees.

### Investment objective

To assist investors in drawdown, looking to preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

### Risk profile

The strategy is risk target managed in accordance with independently defined annual VaR boundaries provided by Dynamic Planner. The strategy is categorised as a Bordier Decumulation Risk Profile 2, Dynamic Planner Risk Managed Decumulation 4, Defaqto Low Sequencing Risk and Mabel Insights 1.

### About the RTD Service

The service consists of four actively managed investment strategies that are designed for investors in drawdown. The service puts capital preservation first and seeks to minimise the risk of eroding capital in falling markets whilst a fixed regular income is being taken.

Each investment strategy has a different level of risk and expected return, with each targeted to a particular risk profile. Each investment strategy is independently verified on a monthly basis to ensure that it stays within the expected annual VaR boundaries assigned to the corresponding risk profile.

### Why RTD?

Investors drawing on their portfolio for a regular monthly income are in danger of negatively impacting the total return available to them based on the timing of their withdrawals. Known as sequencing risk, this can have a significant impact on an investor who depends on the income and is no longer contributing new capital that could offset losses.

Within a dedicated decumulation strategy, volatility is micro-managed to smooth out monthly performance and mitigate risk. By doing so, investors will experience less frequent volatility spikes, decreasing the speed at which the value of their portfolio shrinks.

### Investment update

After an excellent start to the year, equity markets sold off heavily in March. The catalyst for the dramatic reversal was the conflict in the Middle East. The MSCI World Index fell 4.5% in sterling terms however some markets, such as Asia and Japan, fell in excess of 10%. Continental European and UK markets also sold off sharply. The US market was more resilient over the month. The heightened concerns over inflation and the reversal of interest rate expectations also weighed heavily on bond markets. The Bank of England and European Central Bank kept interest rates on hold although acknowledged the potential for a difficult scenario of rising inflation and falling economic growth. Given the continuing uncertainty regarding the Middle East conflict, and the potential impact on energy prices, changes are afoot to reduce inflation/interest rate risk by selling our longer-dated gilt exposure. We will not be reducing equity exposure overall for fear of being whipsawed by volatile markets and the strategy continues to target its corresponding Dynamic Planner risk profile. However, we plan to slightly reduce risk by cutting exposure to Asian equities as we believe this region is the most vulnerable to a prolonged disruption in energy markets. These proceeds will primarily be reallocated to infrastructure assets which offer more defensive characteristics, inflation-protected revenue streams and a high visibility of earnings.

### Performance

#### Inception performance

#### Annualised performance

	1yr	3yr	5yr*	10yr
Risk Targeted Decumulation 4 (13% eq.)	5.1%	4.8%	2.6%	-

#### Discrete performance

	YTD	2025	2024	2023	2022*	2021*
Risk Targeted Decumulation 4 (13% eq.)	-0.8%	6.5%	4.0%	6.1%	-5.4%	2.3%

#### Cumulative performance

	1yr	3yr	5yr*	10yr
Risk Targeted Decumulation 4 (13% eq.)	5.1%	15.1%	13.5%	-

#### Annualised Expected Loss (Value at Risk)

Value at Risk ('VaR') measures the expected maximum loss of a strategy, given usual market conditions, over a specific time period and at a particular confidence level.

Annualised expected VaR (rounded to 1 d.p.) based on latest Dynamic Planner assumptions. Bordier UK asset allocation as at 31.03.26. Dynamic Planner calculates the strategy's VaR monthly using a 95% confidence level.

\*Performance from inception (01.10.20) to 31.01.22 is simulated past performance based on back-tested data (represented by the red dashed line).
