

Strategy details

Inception	01 March 2016
Min. initial investment (direct)	£ 20,000
Min. initial investment (platform)	£ 1,000
Rebalancing strategy (min.)	Quarterly
Currency	£ GBP
Annual yield (current)	1.49%

Charges

Annual management charge (direct)	0.60%
Annual management charge (platform)*	0.20%
Ongoing charges figure	0.47%

*Not including platform fees.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term (five years plus). Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 7, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

About the Blended Risk Targeted Managed Portfolio Service

Our Blended Risk Targeted ('RT') Managed Portfolio Service consists of five actively managed investment strategies (Blended RT 3-7) that provide lower cost access to our discretionary fund management capabilities through the combination of active and passive collective investments. Each strategy has a different level of risk and expected return, and are rigorously mapped within the volatility boundaries assigned to specific Dynamic Planner risk profiles (RTM 3-7). The service provides a solution that, when cost considerations are paramount, does not compromise on quality.

Investment update

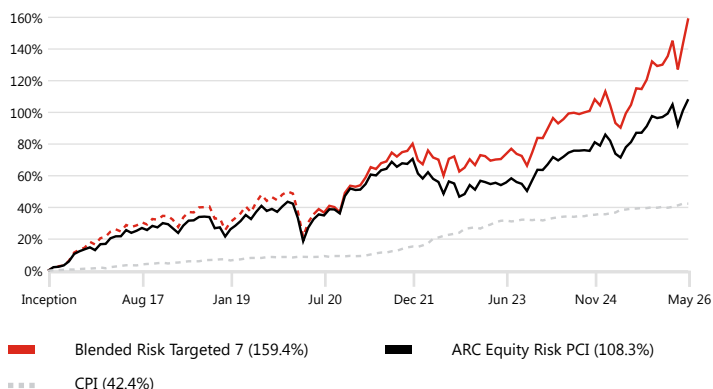

After a strong April, equity markets pushed higher in May with the MSCI World Index rising a further 5.5% in sterling terms. The rally was supported by some strong earnings announcements and by optimism over the prospect of some resolution in the US-Iran conflict, which sent the oil price more than 10% lower over the month.

Technology and AI-related stocks continued to lead the way. As was the case in April, technology-heavy indices such as the US, Korea and Taiwan again benefitted most and outperformed the UK and eurozone, where economic data continues to disappoint. The Japanese market also performed strongly. In addition to the optimism over some progress in the Middle East conflict, investors were buoyed by some strong economic data suggesting that new prime minister Takaichi's growth policies could be taking effect. CPI inflation rose significantly in the US and eurozone, to 3.8% and 2.8% respectively. UK CPI is also expected to rise further. Despite this, global bond indices produced moderately positive returns in May as optimism remains over some resolution in the Middle East conflict and, looking ahead, an implied lower inflationary impact.

While we are already seeing some economic repercussions stemming from the conflict, we do not currently expect the impact on growth and inflation to be sufficient to derail the global economy or result in a prolonged and major shift in the outlook for interest rates. Equity markets continue to be driven higher by very strong earnings announcements, and valuations do not look overly demanding, which leads us to maintain a positive view on the asset class. Turning to fixed income, we sold our exposure to UK government bonds at the onset of the conflict in the Middle East, given the potential risks to the inflation outlook, and we are currently reviewing the opportunities for reinvesting the proceeds that we have held short term in cash. The strategy remains at the upper end of its corresponding Dynamic Planner risk profile.

Performance

Inception performance

Cumulative performance

	1yr	3yr	5yr	10yr*
Blended Risk Targeted 7 (96% eq.)	30.1%	52.1%	57.9%	151.1%
